

GLAST Burst Monitor Status

★ Recent Accomplishments

- DPU, Power box, NaI detectors mechanically integrated.
- BGO high-energy calibration at SLAC

★ Issues in work

- Possible detector swap (now deemed unnecessary)
- Interface box

★ Near-term Milestones

- Installation of BGO's (after LAT installation)
- Functional test
- Calibration
- GIOC hardware installation
- End-to-end test

GBM Mechanical Integration

**Gamma-ray Large Area Space Telescope (GLAST)
Burst Monitor (GBM)**
